

AMENDMENTS TO THE CLAIMS

Please cancel Claim 2 and amend Claim 1 as follows.

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims¹:

- B1*
1. (Amended) A film made out of a thermoplastic material, characterized in that its composition further comprises a combination of at least one organic anti-UV compound, ~~with~~ at least one inorganic anti-UV compound, and at least one chemical binder for improved solubility of the organic compound in said thermoplastic material.
 2. (Cancelled) A plastic film according to Claim 1, whose composition further comprises at least one chemical binder for improved solubility of the organic compound in said thermoplastic material.
 3. (Original) A plastic film according to Claim 1, wherein the thermoplastic material is low density polyethylene.
 4. (Original) A plastic film according to Claim 1, which is a mono-oriented film.
 5. (Original) A plastic film according to Claim 3, which is a bi-oriented film.
 6. (Original) A plastic film according to Claim 1, wherein the inorganic compound is a micronized metal oxide
 7. (Original) A plastic film according to Claim 1, wherein the inorganic compound is micronized zinc oxide (ZnO).
 8. (Original) A plastic film according to Claim 6, wherein the inorganic compound is micronized titanium dioxide (TiO₂).

Appl. No. 09/831,610
Atty: Docket No. CM1956Q
Amdt. dated January 13, 2004
Reply to Office Action of December 15, 2003
Customer No. 27752

9. (Original) A plastic film according to Claim 1, wherein the organic UV absorber compound is a benzotriazole.

B1
cont.
10. (Original) A plastic film according to Claim 9, wherein the benzotriazole organic UV absorber compound is comprised within the list of: 2-(2'-hydroxy-5'-methylphenyl)-benzotriazole, 2-(2'-hydroxy-3'-5'-di-tert.-butylphenyl)-benzotriazole, 2-(2'-hydroxy-3'-5'-di-tert-butylphenyl)-5-chlorobenzotriazole.

11. (Original) A plastic film according to Claim 1, wherein the binder is a benzophenone.

12. (Original) A plastic film according to Claim 11, wherein the benzophenone binder is a 2,4-dihydroxybenzophenone.

13. (Original) A plastic film according to Claim 1, which is a barrier for light with a wavelength comprised within the range of 280 to 390 nm.

14. (Original) A plastic film according to Claim 1, which has a thickness of less than 80 μm .

15. (Original) A plastic film according to Claim 1, whose haze is less than 30% for a 35 μm film.

16. (Original) The use of a plastic film according to Claim 1, for packing consumer products by flow-wrapping.

17. (Original) The process of making a film according to Claim 1, which is an extrusion blow molding process.
